AI & ML Engineer and Full Stack Developer with a strong foundation in software development, artificial intelligence, modern web technologies, API integration, and database driven systems. Experienced in developing responsive web applications, AI chatbot solutions, business software, and practical digital products that solve real world problems. Skilled at combining clean user interfaces, scalable backend logic, and intelligent automation to build efficient, user focused, and impactful technology solutions.

EDUCATION

BEng (Hons) in Software Engineering

London Metropolitan University (UK)

Completed: September 2026

Pearson BTEC Level 5 HND in Computing

Esoft Metro Campus

Completed: Sep 2025

EXPERIENCE

Software Engineer Intern

Medcube USA LLC | Colombo, Western Province, Sri Lanka | On site | Sep 2025 - May 2026

- Completed a software engineering internship contributing to full stack application work using Angular and .NET Framework.
- Supported development, debugging, UI implementation, API integration, and team collaboration across real-world software tasks.
- Applied engineering practices across frontend, backend, and database connected application workflows.

SKILLS

- **Programming Languages:** C#, Python, Java, PHP, HTML, JavaScript, TypeScript
- **Frameworks & Technologies:** Node.js, ASP.NET, .NET Framework, React, Next.js, Angular, Bootstrap, Flask
- **AI & Chatbots:** AI/ML concepts, LLM integration, prompt engineering, Sinhala chatbot flows, AI product prototyping
- **Databases:** MS SQL Server, MySQL, realtime database driven responses
- **Tools & Platforms:** Git, Visual Studio, VS Code, Postman, VPS Handling, Cloudflare SSL
- **Knowledge of:** OOP, Data Structures & Algorithms, RESTful API concepts, full stack architecture

PROJECTS

Qlony Girl (AI Girlfriend Platform)

- Co-contributed with Kaveesha Lasith to Sri Lanka's first AI girlfriend concept, focusing on interactive AI conversation experiences.

Qlony Crypto AI

- Co-built a crypto AI concept designed to analyze market news and realtime signals to support trade signal insights.

Sinhala Business Chatbot

- Built with Kaveesha Lasith to convert sales in Sinhala, answer from databases in realtime, and handle customers through the order process.

Multi Branch Restaurant Management System (Desktop to Web Evolution)

- Evolved a standalone C# desktop POS into a full stack, multiuser web portal with role-based dashboards and real time order tracking.

Emergency Medical Response Portal

- Developed a health tech platform giving first responders instant access to patient medical data through scannable QR codes.
